

Meme Market

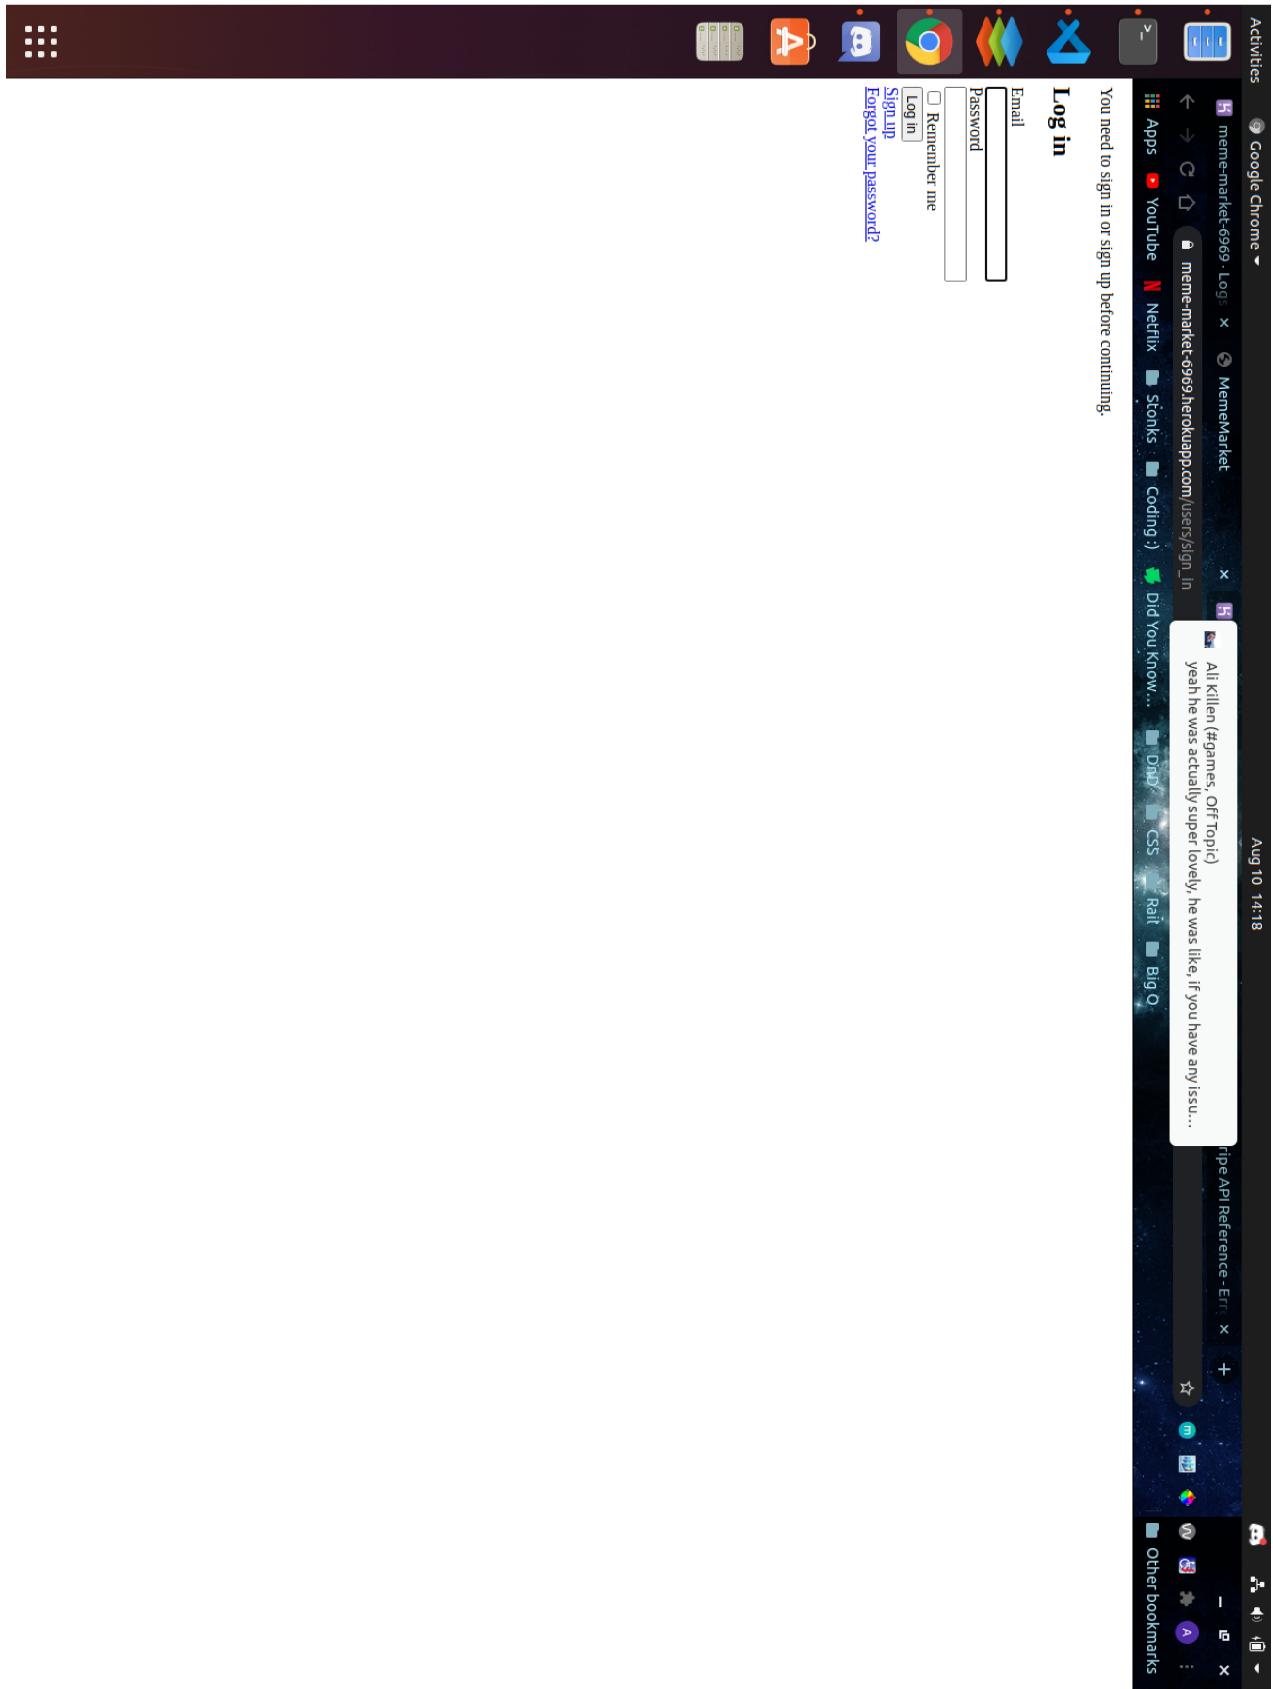

By Anthony Wilde

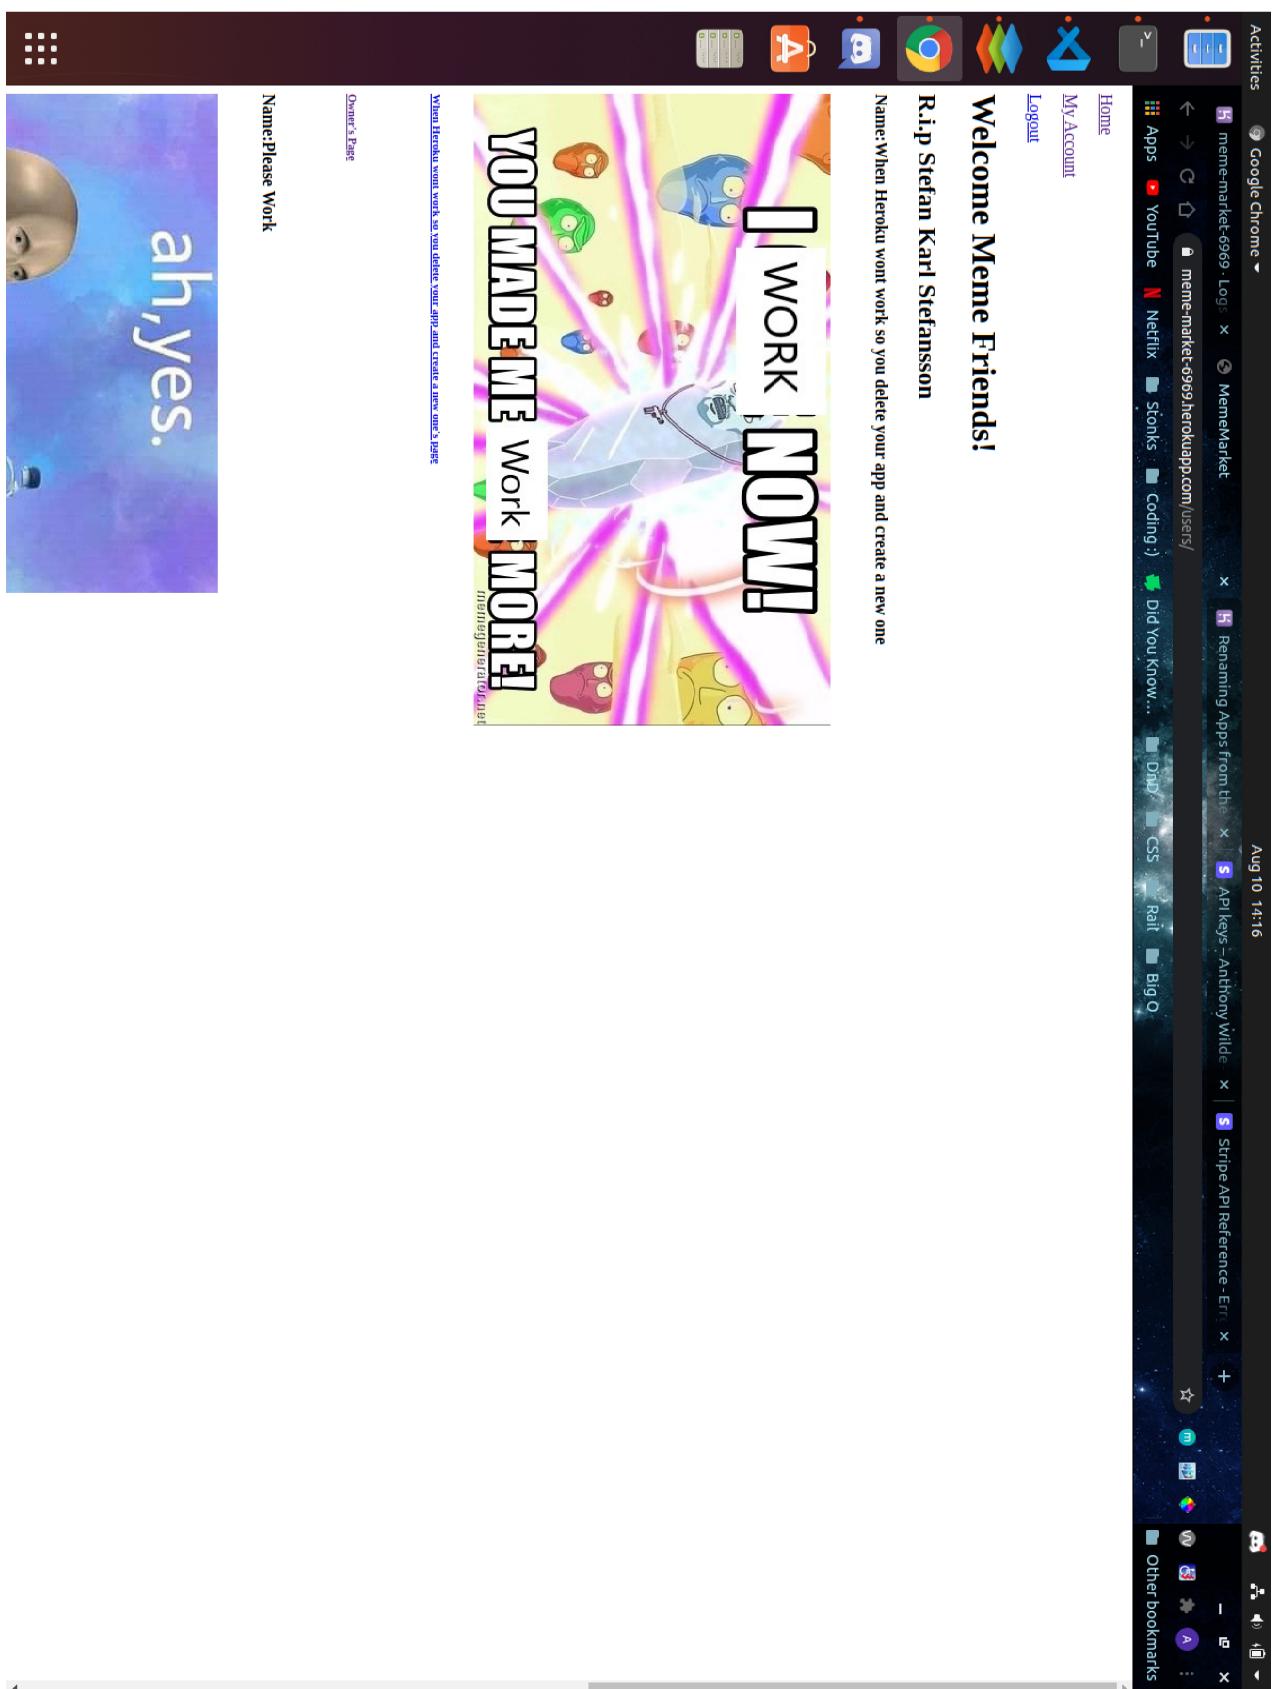

The problem I was trying to solve

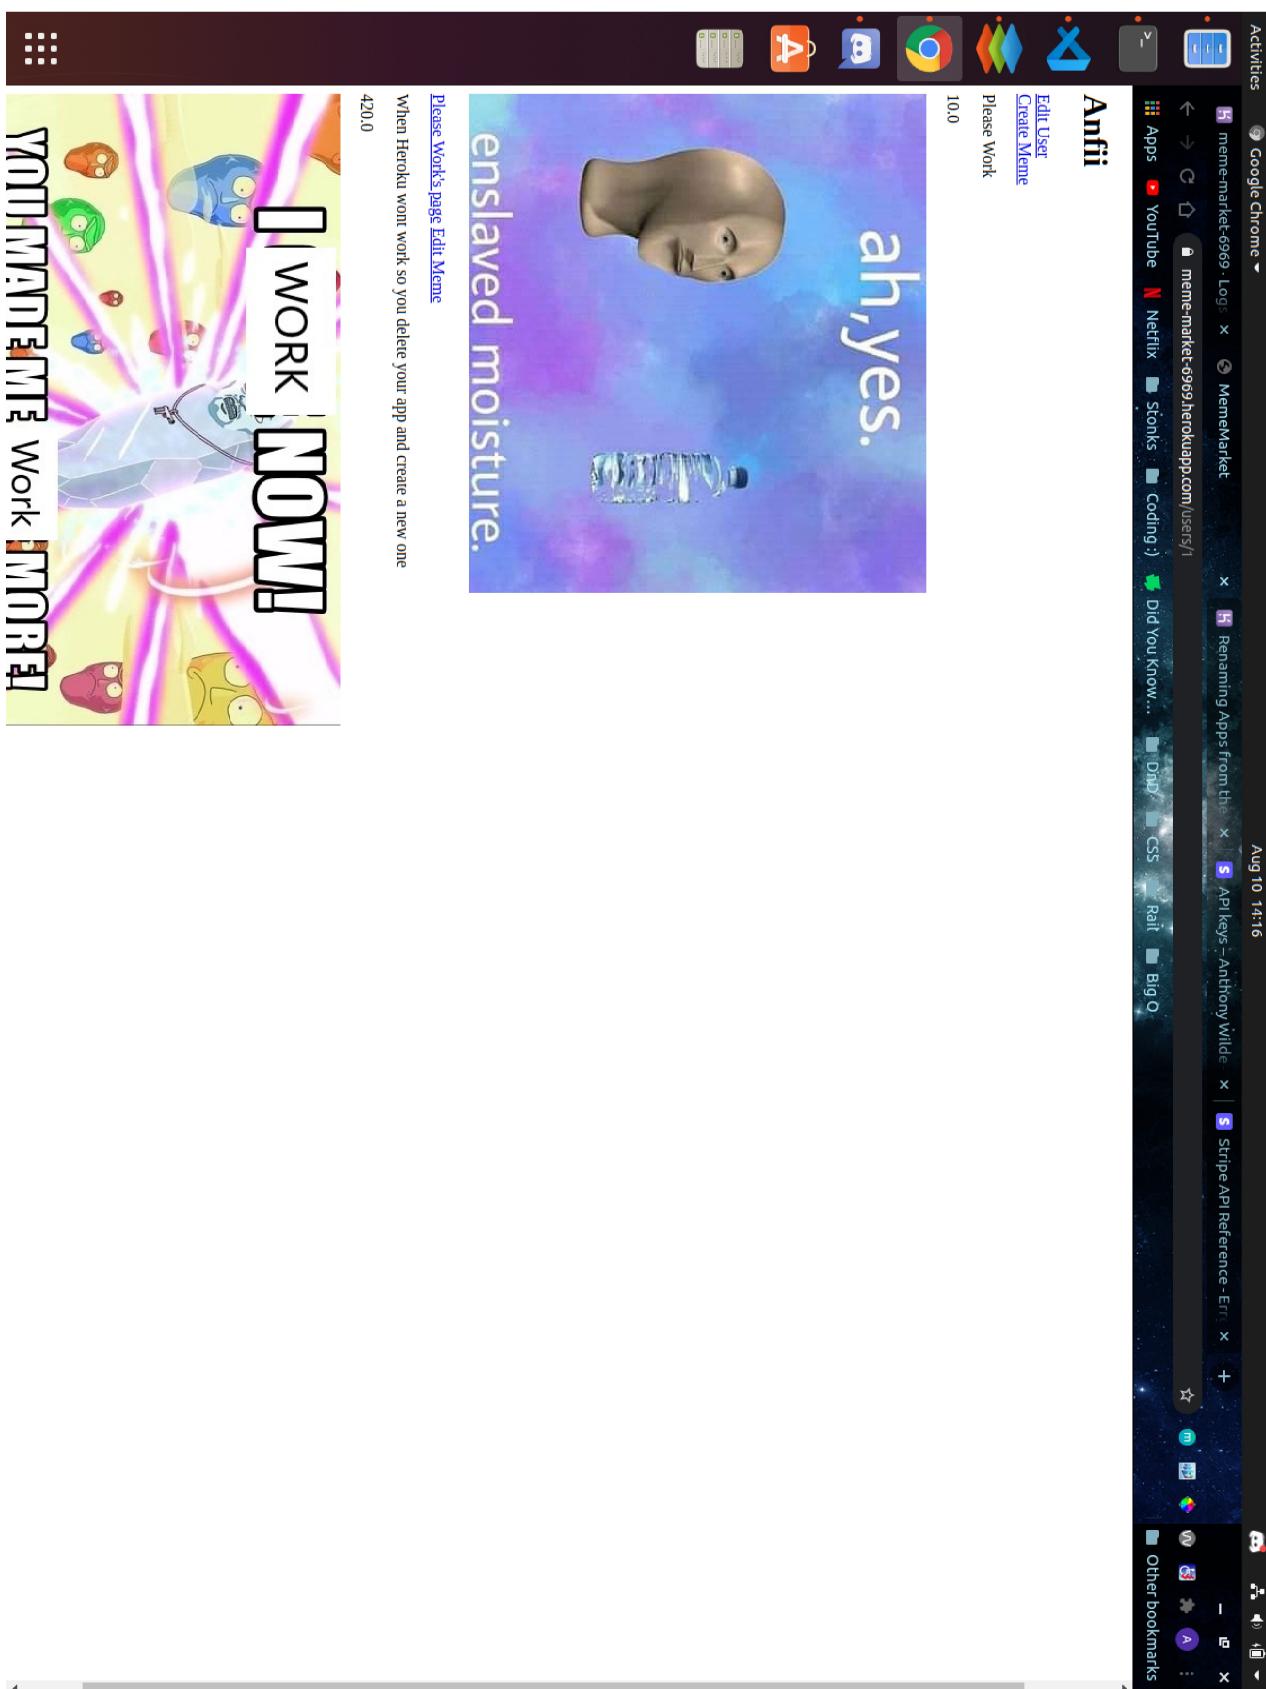

- I am seeking to 'monetise' memes.
- "Just as genes propagate themselves in the gene pool by leaping from body to body via sperms or eggs, so memes propagate themselves in the meme pool by leaping from brain to brain via a process which, in the broad sense, can be called imitation" Richard Dawkins
- I think that the people out there who scroll through the thousands upon thousands of hours of content making our gifts and our meme templates are being taken advantage of for the good work that they do.

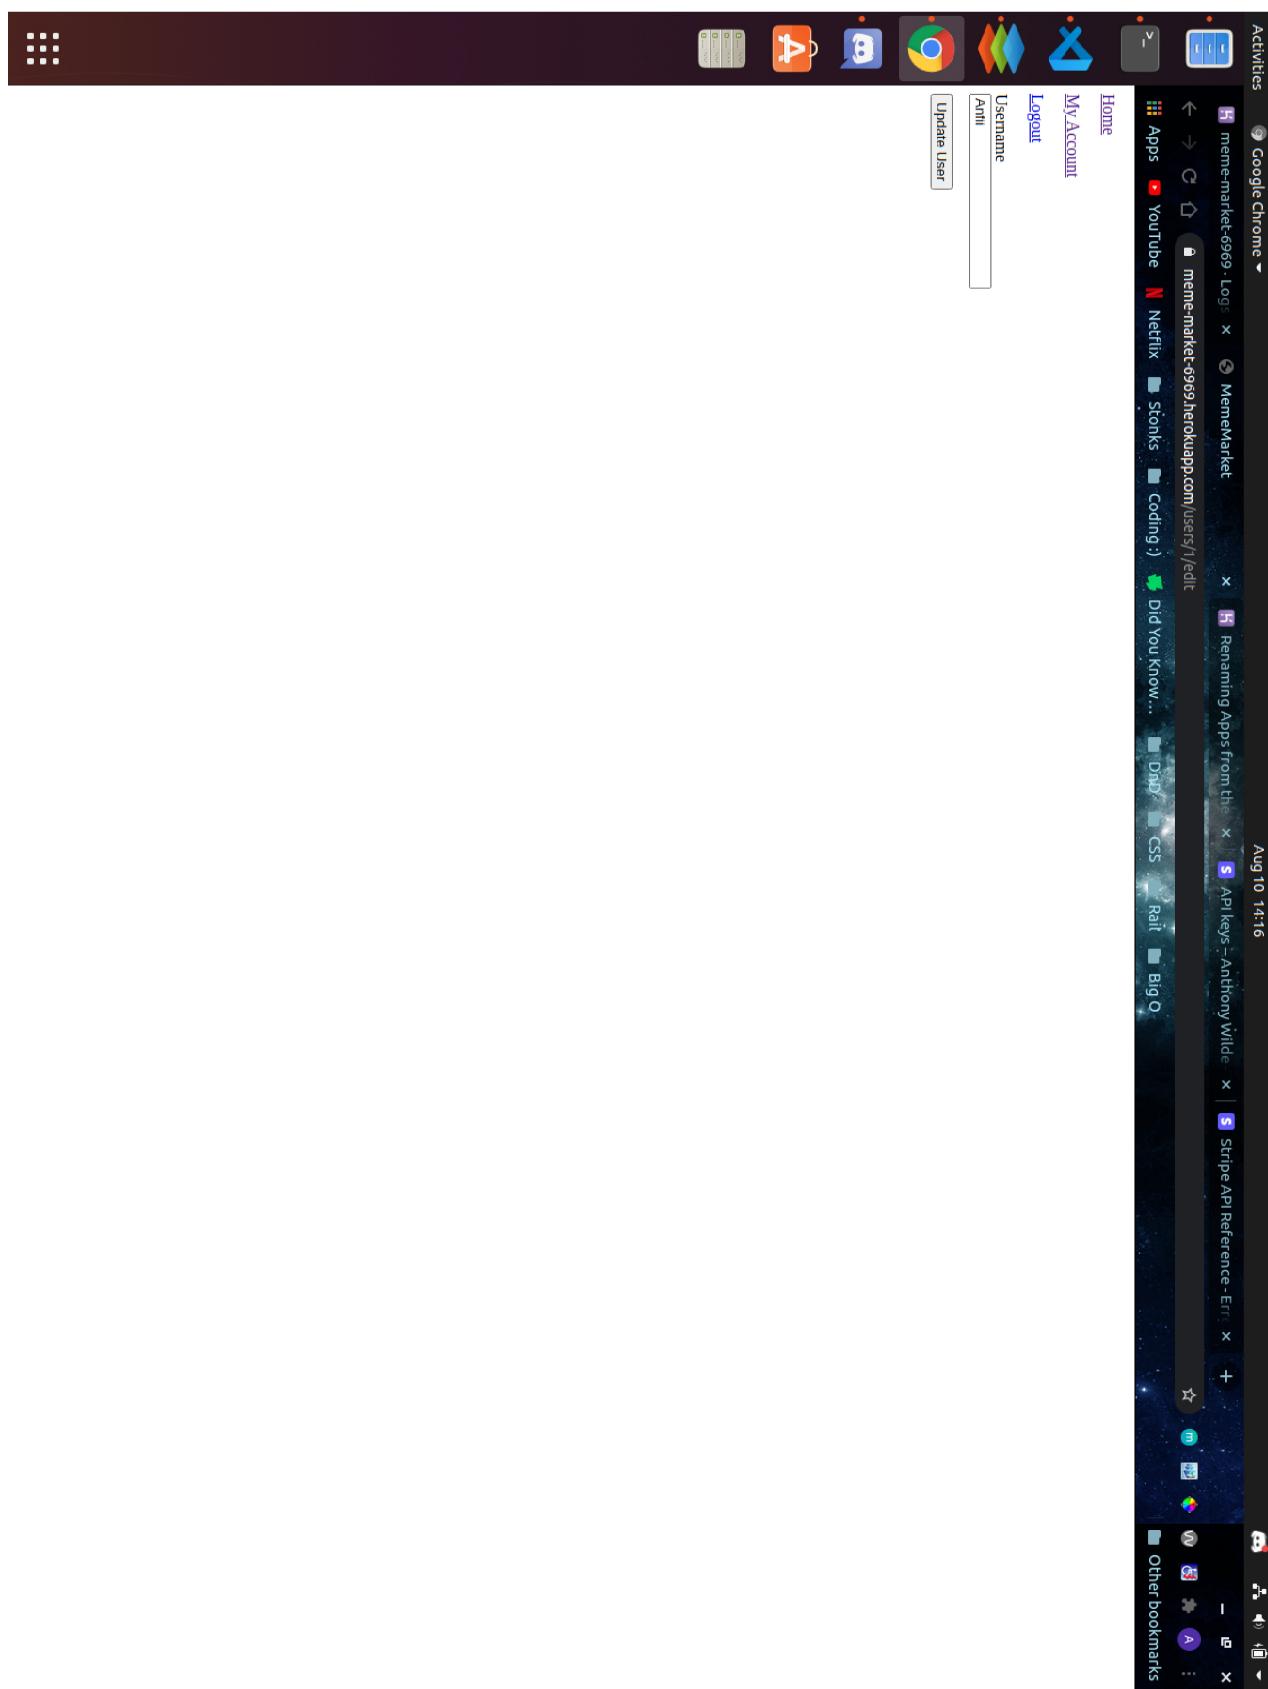

Why is it a problem that needs solving?

- My marketplace will allow for the acceleration of the memes
- It also is a very market directed economic model.
- Help generate jobs where people can just create content for a living.
